Jordan: Insurance federation joins IUMI

The Jordan Insurance Federation (JIF) has joined the International Union of Marine Insurance (IUMI) on 1 November 2023, to enhance expertise and strengthen the exchange of experiences in marine insurance.

Headquartered in Hamburg, the IUMI is one of the strongest bodies specialised in the field of insurance and maritime transport around the world, a statement by JIF says.

The IUMI shares with its members the most important statistics related to marine insurance markets, in addition to research and papers generated from the conferences and meetings that the organisation stages, which is of great benefit to members.

The JIF looks to increase cooperation with the IUMI through technical seminars, programmes and training and seeks assistance from experienced professionals, especially the executive committee of the IUMI.

The insurance associations of other Arab countries which are members of the IUMI include those of Egypt, Morocco and the UAE.

IUMI's members are national insurance and marine insurance associations. In addition, organisations and companies engaged in activities related to marine insurance can become IUMI Professional Partners.
